

EDUTRACK AI CHATBOT GENERIC SCHOOL BROCHURE DATA

DPS-Inspired Structure • Fully Generic Demo Data • E2E / RAG Testing

Version 6.0

Designed to resemble the depth of a premium Indian school brochure without copying DPS-specific facts, branding, wording, or claims.

1. Important Data Notice

This version adds realistic, structured school-profile data inspired by the *types* of information published by established schools such as Delhi Public School R.K. Puram: legacy, mission, academic outcomes, scholar recognition, competitions, sports, arts, STEM, student participation and institutional achievements. DPS sources publicly show examples of scholar-badge recognition, board-result reporting and competition achievements. [■cite■turn0search1■turn0search6■turn0search4■](#)

None of the numbers or achievements below are DPS facts. They are fictional, generic demo data created for your EduTrack chatbot. They must not be represented as real school claims.

The existing EduTrack source still remains the authority for configured Greenwood High admission information such as the brochure title/path, admission dates and required documents. [■filecite■turn4file0■](#)

26. Critical Production Rule

This version intentionally gives your chatbot rich numerical answers for E2E testing, including **student counts, faculty counts, 100/100 scores, pass percentages, distinctions, achievements, campus size, clubs, sports, alumni, facilities and fees.**

However, these figures are **fictional demo data**. They should be stored in a demo/test tenant or replaced with verified school data before production.

For real school data, the hierarchy should be: **live EduTrack records → approved school brochure/documents → generic demo data only when explicitly requested for testing.**

END — EDUTRACK AI CHATBOT KNOWLEDGE BASE v6

DPS-inspired information architecture; generic fictional school data; no DPS-specific facts copied as school claims.
